

TagAlarm and TagCam

Security Solutions for Site Compounds

Control of safety and security on a construction site compound is a major problem for Site and Contract Managers nationally, yet most security solutions only focus on the out-of-hours coverage.

The demand on site to control health and safety of both employees and the general public entering a site is a major headache. Site managers need to implement a quick reliable solution for the protection of a site by detecting authorised and unauthorised entrants day and night, while maintaining controlled costs. Tag have the answer – by installing CCTV it firstly acts as a deterrent and provides additional ‘eyes’ on your site, and also records 24/7 – crucial – especially when your back is turned.

Cameras can be installed to monitor the compound, personnel entrance and if required, vehicle and delivery entrances. Images are recorded locally to a DVR and provide a full record of all events. All images are time and date stamped and watermarked, making them acceptable as evidence. Live and recorded images can be displayed on a 19” colour monitor in the site manager’s office. If broadband is available on site then the system is Smart phone compatible, allowing off site viewing.

Solutions for:

Has anyone ever been hurt on your site – was it seen?

Do you want to show the progress of your site – during a project meeting at head office?

Knowing who is on site and when – cross-checking against billed hours?

Are your Sub-Contractors wearing the correct PPE at all times?

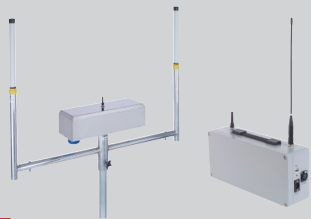

Just a few questions that CCTV can capture, record and answer for you.

Product Information

- Standard and Hand Portable Base Station
- Hand Portable range: Maximum 150 metres
- Standard range: Maximum 300 metres

- IR 35 Internal use
- Wide angle range: 11 x 11 metres
- Narrow angle range: 1.2 x 17 metres

- IR 70/2 External use
- Range: 2.5 x 45 metres

- Guard Attendance Tag (GAT)
- Mobile response arrival/ departure verification

- Active (TX/RX) Transmitter / Receiver
- Perimeter (minimum install of x2 units)
- Range: Up to 75 metres

Quad

Dual

- IR114 FR (Quad) and IR114 R (Dual), Internal or External use
- Quad range and spread: 12 metres with 180° coverage
- Dual range and spread: 12 metres with 90° coverage

- PTZ: Pan range of 365°; Tilt range of 90°; Zoom 2x optical capability
- 'Day/Night' function to provide optimised sensitivity in both day and night environments
- An integrated 64 Gb solid state storage (approx 14 days)
