Site Access Controller

A web based, real-time, progress reporting and workforce attendance monitoring system developed primarily for railway track renewal operations, which is fully adaptable to suit other aspects of civil engineering works.

The Site Access Controller (SAC) acts as a railway worksites administration centre, responsible for controlling access/egress to site and collating reports. They form a single point of contact from the worksite to the outside world

Electronic Site Access Control management

■ Our SACs, using laptops, regularly update our online suite of site reports, schedules and personnel registers which gives our clients a live view of the status of their worksite .All our SACs are provided with full PPE and after a probationary period are put through PTS or LUCAS certification to improve their knowledge of track works and ensure a safety focus

Control

■ Based at Head Office, our Reporting Centre is open 24 hours a day, 7 days a week .It provides a cost effective solution for signing in and reporting on smaller sites, where a SAC is not specifically required .This allows you to benefit from signing in 100% of your workforce into a central system with bespoke reporting.

Reporting

■ Our reporting centre currently conduct 100% sentinel checks and as the new Sentinel scheme roles out, we can use this facility to provide a cost effective, reliable alternative to the purchase of costly but delicate site based IT solutions such as mobile phones

Support

■ IT team are always on hand to discuss your individual requirements, or training needs .We have dedicated servers based off site with guaranteed 99% up time .The team are always evolving the system to bring in improvements as well as developing new and innovative products to enhance the overall user experience and systems solution.

Benefits

■ Once you have the reporting centre on board, they can do so much more – direct workers/contractors to site, act as a control room/contact centre for you, provide out of hours help and advice on the System with access to our on call managers if required: The possibilities are endless Collect a massive amount of data, all of which is securely stored and never erased .This data can be used to help you better plan future works .A suite of reports is available at your fingertips to review.

■ Staff on your sites who have breached 12/14 hour rules

■ Plant problems

■ Incidents/accidents on site

■ Staff that Did Not Sign Out and many more...

■ Bespoke reporting (and associated data collection) can be arranged to suit your needs.
